

Jazz Vocalist Sings at St. Louis Children's Hospital

Presented by Jazz St. Louis in cooperation with the Washington University Neurofibromatosis (NF) Center, jazz vocalist Sara Gazarek came to St. Louis Children's Hospital to perform.

Ms. Gazarek has recently emerged from the Los Angeles jazz scene as a strikingly original vocalist with limitless potential. Blessed with a gorgeous, translucent voice, Sara sang children's songs and one of her pianist's original compositions in the Child Life Playroom on Friday afternoon.

Over the past year, the Washington University NF Center has partnered with Jazz St. Louis in an effort to raise awareness about neurofibromatosis.

We thank Jazz St. Louis for their enthusiastic support.
